Profile Summary

Full Stack Developer with hands-on experience in building scalable web applications using **Laravel, React.js, Node.js, MySQL, and MongoDB**. Skilled in **REST API development, payment gateway integration (Adyen/Stripe), microservice-oriented backend architecture, WebSocket-based real-time features, and secure user authentication**. Passionate about backend engineering and high-performance systems. **Ready to relocate and join immediately.**

Technical Skills

Backend: Laravel, PHP, Node.js, Express.js

Frontend: React.js, JavaScript (ES6+), CSS

Databases: MySQL, MongoDB

Payment Integrations: Adyen, Stripe

Tools: Git, GitHub, Postman, VS Code

Deployment: Vercel, Render, Netlify

Others: WebSockets, JWT Auth, REST APIs, AI/LLM APIs (Basic)

Work Experience

Software Engineer

April 2026 – Present

E Software Solution

Yamuna Nagar, Haryana

- Developing enterprise web applications using **Laravel, PHP, MySQL, JavaScript, jQuery, and RESTful APIs** for healthcare and business domains.
- Contributed to the development of the **Ganga Mata Charity Eye Hospital Management System**, streamlining patient registration, appointments, consultations, and medical records.
- Integrated **Ayushman Bharat Digital Mission (ABDM)** Milestone 1, Milestone 2, and Milestone 3 (Scan & Share), including ABHA creation, patient discovery, and health record linking.
- Developed and integrated secure RESTful APIs, ensuring reliable data exchange and compliance with ABDM standards.
- Collaborated with cross-functional teams throughout the SDLC, including requirement analysis, development, testing, deployment, and production support.

Software Engineer

July 2024 – March 2026

Hipster Inc.

Lucknow, Uttar Pradesh

- Contributed to the development of **Natureland – Spa Therapy**, a full-stack spa management platform featuring **Admin, Outlet, and Customer modules**.
- Engineered and optimized **RESTful APIs using Laravel/PHP**, reducing average response time by **25%** and improving backend scalability.
- Integrated the **Adyen Payment Gateway** (Google Pay, Apple Pay, Card, AliPay, PayNow, WeChat Pay), increasing **transaction success rate by 18%**.
- Implemented **real-time WebSocket architecture** to reduce booking confirmation time from **30s to under 5s**, enhancing outlet coordination and customer experience.
- Developed a **WhatsApp AI Support Chatbot for C & W** using **Laravel, Twilio API, and OpenAI API**, enabling AI-powered issue reporting and agent-assisted support.

Projects

Natureland: Spa Therapy (Hipster Inc.) | *Laravel, PHP, React.js, MySQL, Adyen Payment, WebSocket*

- Developed a full-stack spa management platform with **role-based Admin, Outlet, and Customer panels** for scheduling, booking and staff operations.
- Built and optimized **RESTful APIs in Laravel/PHP**, ensuring scalable data flow and reducing backend latency by **25%**.

- Integrated **Adyen Web Payment Gateway** (Google Pay, Apple Pay, Card, AliPay, PayNow, WeChat Pay) across frontend (**React.js**) and backend, increasing successful payment completion by **18%**.
- Implemented **WebSocket-driven real-time events** for live booking updates, reducing confirmation cycle **from 30s to under 5s**.

C & W Support Chatbot (Hipster Inc.) | *Laravel, PHP, Twilio API, OpenAI API, MySQL*

- Developed a WhatsApp-based AI support chatbot for C W, a Singapore-based enterprise, enabling users to report issues and access customer support efficiently.
- Built the backend using **Laravel** and integrated the **Twilio WhatsApp API** for real-time messaging with users.
- Integrated the **OpenAI API** to enable AI-powered conversations, allowing users to report issues naturally through chat.
- Implemented two support channels: **Chat Support** for AI-assisted issue reporting and **Call with Agent** for connecting users with customer support representatives.
- Designed APIs and database workflows to manage conversations, support requests, and agent interactions, improving the overall customer support process.

Ganga Mata Charity Eye Hospital Management System (E Software Solution) | *Laravel, PHP, MySQL, ABDM*

- Developed a Hospital Management System at **E Software Solution** for Ganga Mata Charity Eye Hospital to streamline patient registration, appointments, consultations, and medical record management.
- Integrated **Ayushman Bharat Digital Mission (ABDM)** Milestone 1, Milestone 2, and Milestone 3 (Scan & Share) to enable compliant digital healthcare workflows.
- Implemented ABDM APIs for **ABHA creation and verification, patient discovery, health record linking, and Scan & Share** functionality.
- Developed secure RESTful APIs and authentication mechanisms, ensuring reliable and standards-compliant healthcare data exchange.
- Collaborated with cross-functional teams to optimize hospital workflows and improve the efficiency of digital patient onboarding and record management.

Education

School Of Management Sciences	2020-2024
<i>Bachelor of Technology in Computer Science (CGPA: 7.66)</i>	<i>Lucknow, Uttar Pradesh</i>
Adarsh Vidya Mandir	2020
<i>Intermediate (Percentage: 69)</i>	<i>Mahagaon Papuara, Uttar Pradesh</i>

Certifications

Full Stack Generative & Agentic AI with Python – (In Progress)

- Currently learning **Generative AI, Large Language Models (LLMs), Agentic AI, RAG**, prompt engineering, and AI application development using Python.
- Building AI-powered applications by integrating LLM APIs, AI agents, vector databases, and automation workflows.

Full Stack Development – Coding Shuttle (Certificate Link)

- Developed and deployed full-stack web applications using HTML, CSS, JavaScript, React.js, and Node.js.
- Designed and implemented RESTful APIs with Node.js and Express.js.

Oracle Cloud Infrastructure Foundations – Coursera (Certificate Link)

- Gained hands-on knowledge of cloud computing concepts including compute, storage, networking, IAM, and security.
- Learned fundamentals of deploying and managing cloud workloads using Oracle Cloud Infrastructure.
